DATA ANALYST | BUSINESS INTELLIGENCE | COMMERCIAL ANALYTICS

Professional Summary

Data Analyst with practical experience in Business Intelligence, commercial analytics, and process automation, focusing on sales, revenue, profit, and inventory KPI monitoring. Skilled in Power BI, Python, and SQL for dashboard development and report automation, with a proven track record of contributing directly to operational cost reduction. Currently pursuing further education in Information Technology and an MBA in Machine Learning in Production, combining a strong analytical foundation with a continuous learning mindset and a focus on technical growth in the data field.

Professional Experience

Data Analyst – Daubert Brasil

Jan 2026 – Present

- Developed commercial and strategic dashboards in Power BI to monitor sales indicators and business performance.
- Monitored and analyzed KPIs related to revenue, profit, inventory, and order success rate.
- Automated commercial reports using Python, reducing by 96% the operational time of a process performed twice daily by the commercial department.
- Supported strategic decision-making through commercial data analysis and performance indicators, contributing to an annual reduction of approximately R\$ 540K in fixed operational costs.
- Monitored the performance of 5 sales representatives through metrics, KPIs, and commercial targets.
- Conducted strategic analyses focused on customer prospecting and retention/recovery initiatives using sales and revenue indicators.
- Developed annual revenue analyses and sales performance indicators to identify growth opportunities.
- Acted as a strategic interface between the outsourced national marketing team and the international team, ensuring campaign alignment with global company guidelines.
- Participated in biweekly international meetings to align marketing strategies, campaigns, and materials.

Intern – PEPOLA India

Jul 2025 – Sep 2025

- Developed an automated webinar registration management agent integrated via API with the payment platform. The workflow received registrations, automatically sent payment links, and granted webinar access after payment confirmation without manual intervention from the team.
- Created an automated content generation tool that identified trending topics in the gaming industry to support the marketing team's social media content strategy.
- Supported the analysis of operational and commercial indicators to assist internal teams in data-driven decision-making.

Mathematics Teacher

Feb 2020 – Jun 2025

- Planned and developed Mathematics lessons focused on analytical thinking and problem-solving skills.
- Developed communication, leadership, and problem-solving skills through classroom management and student engagement.
- Monitored academic performance using educational metrics and performance indicators.
- Worked in collaborative, results-oriented environments.
